

MOD 0 STOCK SERIES

THE NEXT STEP IN PERFORMANCE CARBINE STOCKS

The BCMGUNFIGHTER™ Stocks are a series of drop-in replacement stocks for the M4 Carbine, built to be lighter and more durable than the base equipment. Using a patented* internal latch system, the Stock features an ambidextrous QD interface port, a web sling attachment slot, a built-in buttpad and the VBOS(Vehicle Borne Operations Sling) Tab, for securing a sling while not worn on body. The stocks are available with either a minimalist(Mod 0) or more pronounced cheek weld(Mod 0 SOPMOD).

*United States Patent Number: 9,109,855

A 3D cutaway diagram of a rifle's internal latch adjustment system. The diagram shows a white receiver extension with a yellow latch pin inserted into it. The latch pin has a unique, flat-sided geometry. The background is dark grey with a large, stylized yellow 'M' shape on the left side. The title 'UNDER THE HOOD' is written in large, bold, white capital letters on the right side.

UNDER THE HOOD

The patented internal latch adjustment system reinvents the stock interface, creating a precise engagement and fit with a Mil-Spec buffer tube. Specifically engineered to dissipate impact stress through the assembly, the precision fit latch is made from heat-treated ordinance grade steel and is flat on all sides to ensure the Stock interface with the receiver extension cannot be obstructed by dirt or debris. Its unique geometry also provides increased torsional strength and eliminates the stress-riser found on conventional rounded pins.

VBOST

Should the end-user need to run with their sling off, such as in a vehicle, the stock includes a VBOST (Vehicle Borne Operations Sling Tab). This removable tab interfaces with the shooter's riggers band or bungee to secure the shooter's sling when S-folded against the stock when the carbine is not in use.

SLING UP

With both ambidextrous QD swivel ports and slots for conventional web sling attachment, the BCMGUNFIGHTER™ Stocks are built with versatility to support multiple tactical applications.

MADE IN AMERICA

All BCM® products unite state of the art manufacturing with the lightest and most durable materials to ensure components that last a lifetime, performing far beyond performance requirements established nearly six decades ago. Like all BCM rifles and BCMGUNFIGHTER™ accessories, the BCMGUNFIGHTER Stock is designed and made in the USA.
